

2.4GHz Portable Digital Wireless Intercom Systems

Wireless Intercom Portable Base

No License Required

RC2401SV

**Full-Duplex Hands-Free Operation with Ronk's Low Price Intercom !
Up to 4 People can talk simultaneously Without Base Station !**

Characteristics

- **Full-Duplex, hands-free, simultaneous talk by up to 4 people with belt packs only (without base station)**

RonCom RC2401 series offer a new wireless communication system similar to telephone talk or telephone conference by multiple people but movable and flexible. By setting up one belt pack as a portable base, up to 4 people can have full-duplex, hands-free, simultaneous two-way communications.

- **High Security**

Ronk's own protocol makes the only belt packs authenticated by the portable base allow to listen and to speak. Therefore no worries about information leakage such as eavesdropping.

- **Clear Digital Sound using 2.4GHz Band**

You can recognize noiseless, clear voice sound by transmitting digital signals without interference.

- **No License Required**

No license required, and you can easily operate Ronk's intercom soon after introduction.

- **Surprisingly Low Price**

If you are under consideration of purchasing / introducing our products with limited budget, please contact us !
